- Wildlife Biologists
- Hydrologists

### *No One Loses... "No Net Loss"*

Delta assists its clients in making well-informed decisions that improve the environment and aid their business development; so that no one loses, including our environment.

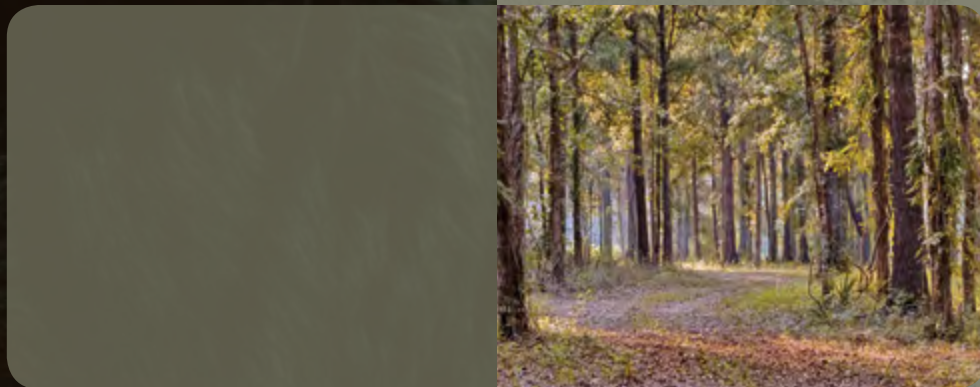

## Permitting & Regulatory

Delta's grass roots beginnings promote precision across the company, allowing for more detail, more efficiency and more personalized relationship development. Our technical team's excellence in writing ecologically sound mitigation plans eliminates rework and re-submittals, helping to accelerate the permit approval process.

Delta is able to assist its clients with the coordination of appropriate regulatory authorities and permitting needed in order to proceed with development. Our permitting experience and our relationships with regulatory agencies and conservation groups have been instrumental in meeting project deadlines and expectations.

## RESTORATION & PROGRAM MANAGEMENT TO OFFSET DEVELOPMENT:

Over half of the original wetlands in the US have been drained and converted to other uses. As a mitigation company, Delta is committed to offsetting these negative impacts by restoring and protecting streams and wetlands, as well as providing habitat for threatened and endangered species, such as the Louisiana black bear.

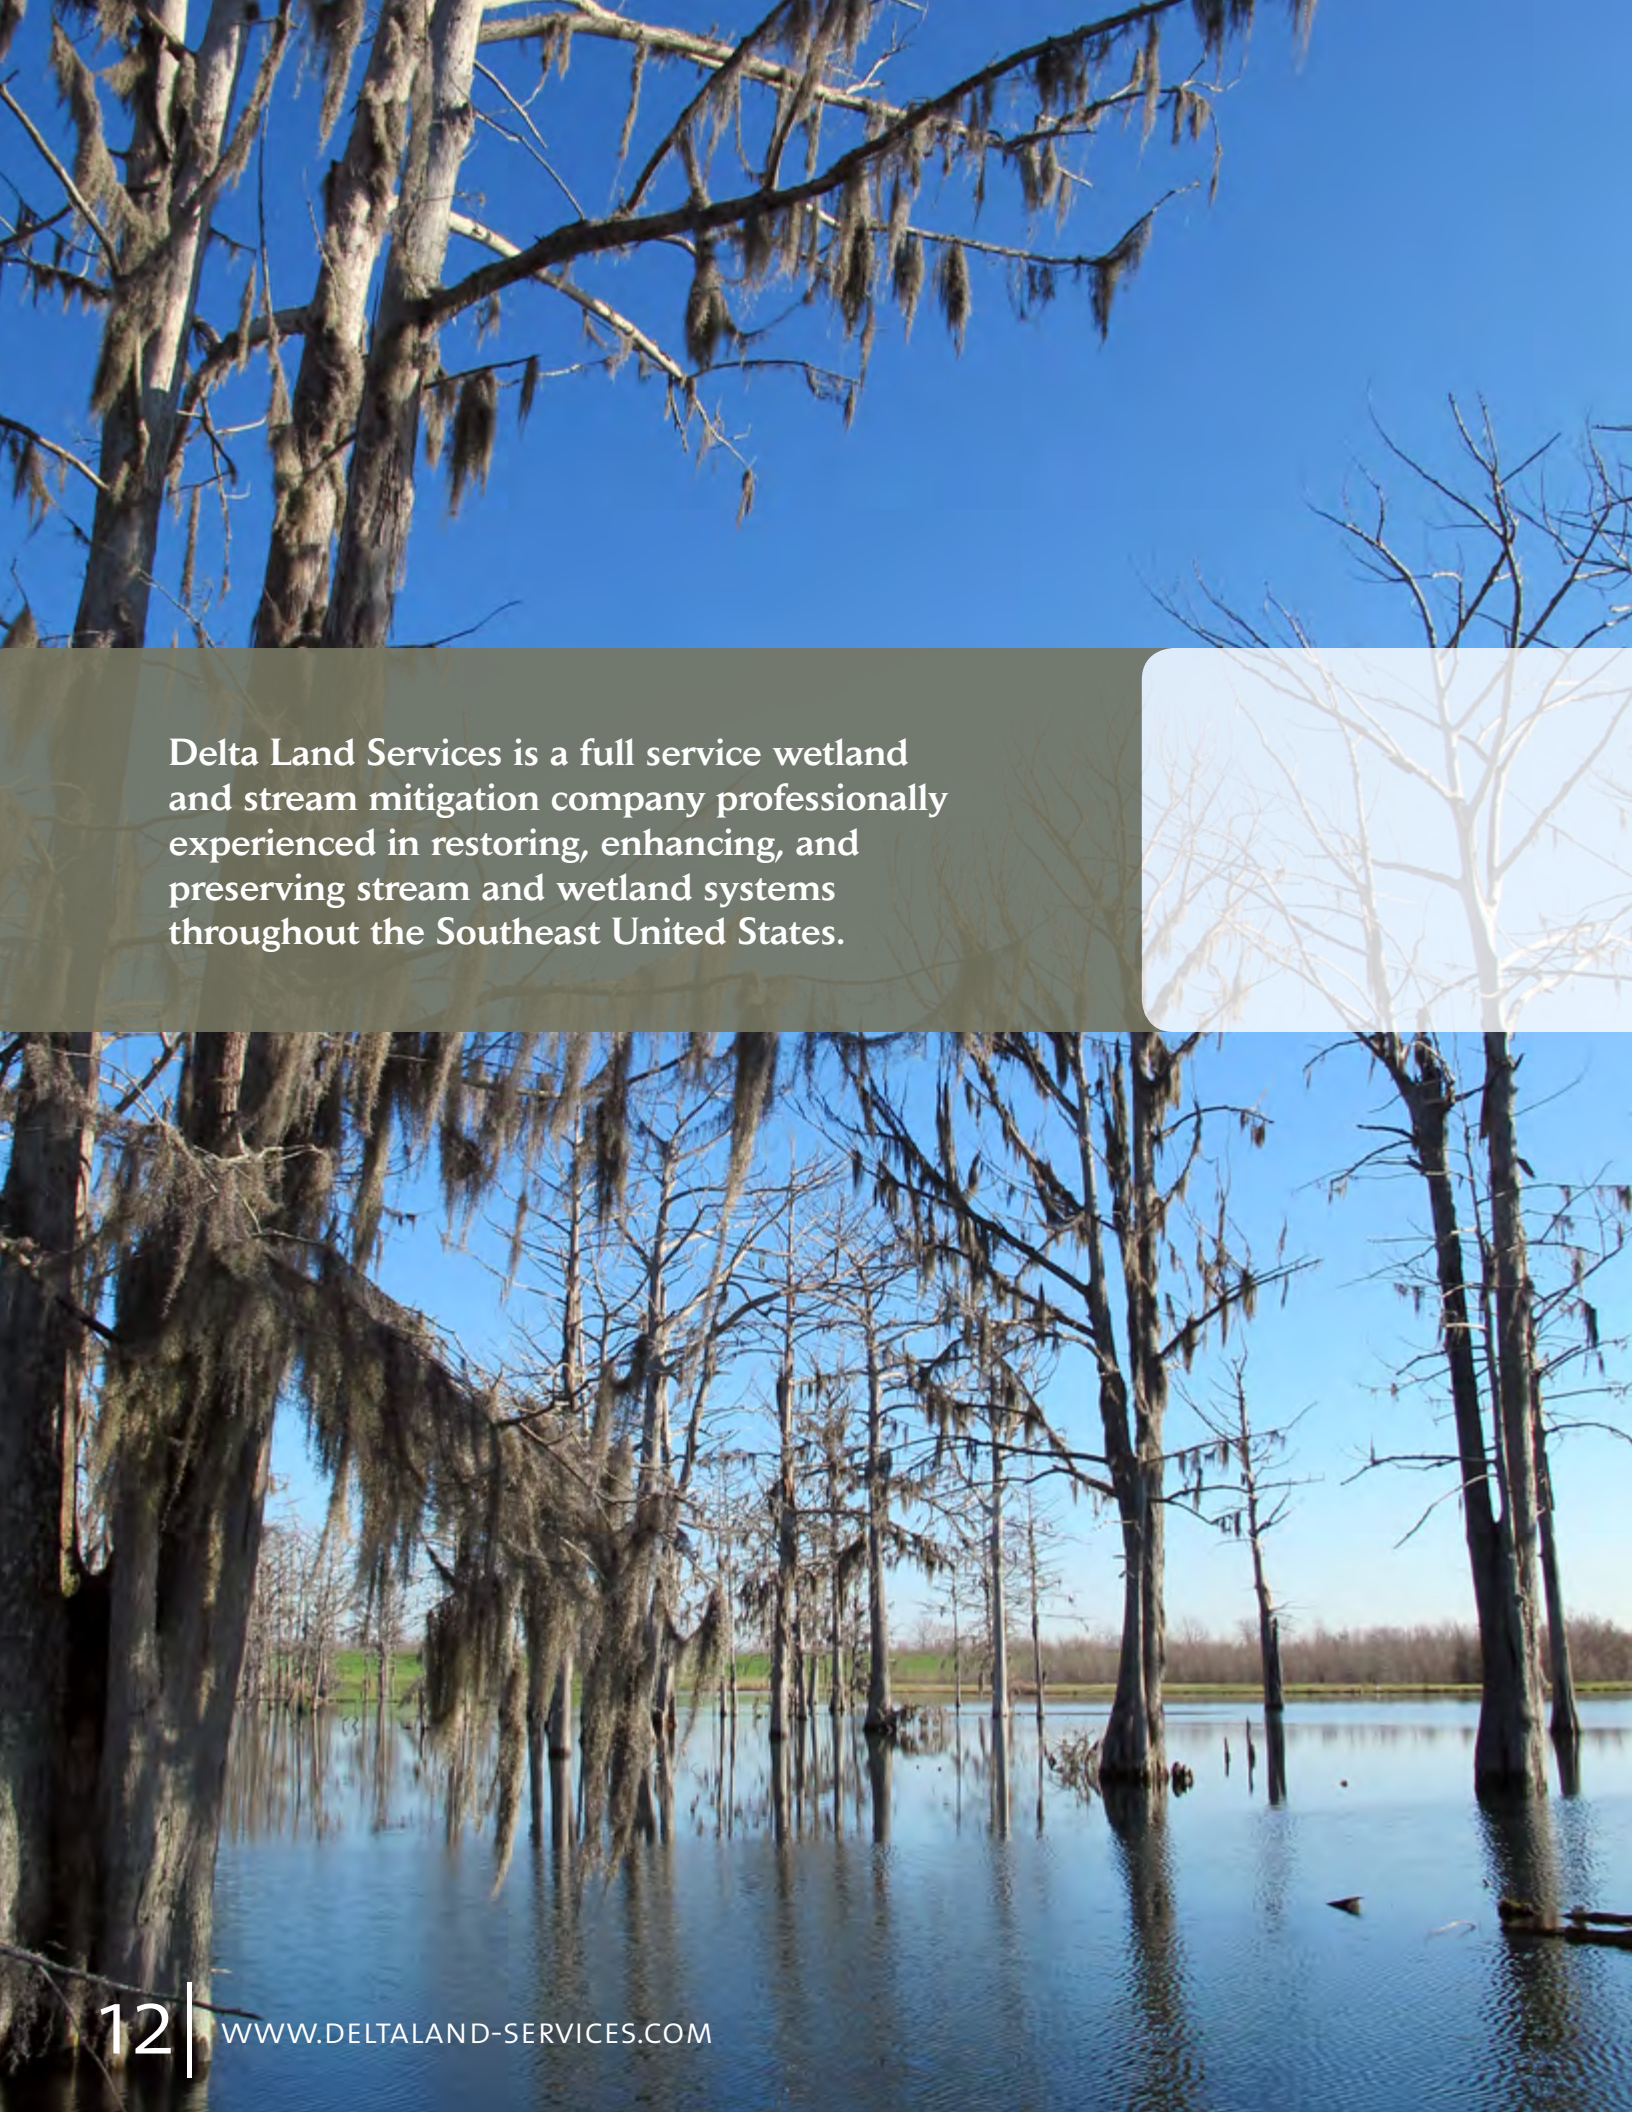

We use our internal and external resources to excel in stream and wetland:

- Design
- Restoration
- Construction

Delta continues to develop unique and specialized structures, features and methods, utilizing our knowledge of and experience in:

- Ecology
- Hydrology
- Engineering

Delta Land Services is a full service wetland and stream mitigation company professionally experienced in restoring, enhancing, and preserving stream and wetland systems throughout the Southeast United States.
